

Buyers Lab Product Summary

Finding the right mix of hardware and/or software for your business can be challenging, but Keypoint Intelligence Buyers Lab (BLI), the world's leading independent evaluator of document imaging hardware and software products, can help you sort through the clutter to find your ideal solution. A Buyers Lab Product Summary provides a look at how a combination of hardware and/or software products can benefit an organization. In this summary you may find individual product benefits assessments, which contain information distilled from BLI's exhaustive hands-on product testing by our experienced staff of lab technicians and analysts, as well as product overviews and/or first looks, which are BLI's first impression of a new hardware or software product. For the full test report on each product included in this summary, visit www.Keypointintelligence.com/research.

Since 1961, Buyers Laboratory (BLI), a division of Keypoint Intelligence, has been the world's leading independent provider of analytical information and testing services to the document imaging industry. New & Noteworthy

The Ricoh MP 6055 is a 60 ppm monochrome MFP that replaces the Ricoh MP 6054. Compared to its predecessor, the 6055 features a larger touchscreen and near field communication (NFC) that was unavailable on the 6054. NFC enables easy mobile connectivity for printing and/or user authentication. The Ricoh MP 6055's 220-sheet document feeder can scan up to 110 impressions per minute in color and monochrome, which is 31 impressions faster than SP models. Workplace efficiency is also enabled through a first-page-out time of 2.9 seconds, toner cartridges yielding approximately 37,000 pages, and the ability to print from mobile devices via the RICOH Smart Device Connector app and Apple AirPrint. Security features like data overwrite, scan tools like optional optical character recognition (OCR) and delivery preference settings, and compatibility with third-party workflow software add to the Ricoh MP 6055's functionality.
